## **Our 2009 Collection of Daylilies**

### ***Spectacular Bloom & Outstanding Performance !***

This is turning into what may be described as the best bloom season ever. Our 20 years of selecting cultivars is paying off with the finest collection of Daylilies we know of. Spring development has been excellent with more and better scapes than we have ever seen. Cool nights have caused some of the bloom to be a little slow opening in the morning but the quality, size and colour is the best we have ever produced.

Mail-orders are shipped as bare root plants from May until September. If you live close enough to pick up plants, many of our cultivars are available as Container Grown plants that may be planted anytime without losing a beat. Look farther through the catalogue for a list of cultivars that are available in 2 gallon containers.

Our divisions are larger than the competition and we find it amusing how often other Daylily sellers buy our plants and openly tell us how they divide them to resell. In our 2 gallon containers, we aim for small clumps guaranteed to bloom this year, some of them have a dozen or more fans.

Our one gallon Clearance plants continue to be extremely popular, and we will be adding to this collection through the season. Where else can you get mature double fans or better for \$3.50 ?

Pickups may be arranged in our home garden (central Toronto), our Etobicoke garden, or our Hamilton Garden (on the west mountain). Just send an email or give us a call to make arrangements.

We hope we can be of service.
